Dear Ladies and Gentlemen,

With this, you receive the Volmary Young Plants & Seeds Catalogue Spring 2025.

The range consists of our strongest varieties and has been expanded with many innovations. All varieties have performed excellently in international comparisons.

An exciting alternative to vigorous, early-flowering fuchsia classics is our upright-growing **'Fuchsita® XL'** series. Due to its branching and medium growth, it is ideal for retail and production businesses. Particularly attractive are the bright double flowers of our new product the **'Fuchsita® XL Double Rose-White'**.

Delosperma is known as a drought-tolerant rock garden shrub. Our **'Suntropics®'** are sunny, permanently flowering plants for cultivation outdoors or in a polytunnel. The wide range of colours of this series is enchanting. It has now been expanded to include the variety **'Suntropics® Pink Sun'**, whose pink flowers have a yellow centre.

**Salvia x hybrida 'Salgoon®'** also impresses with its high drought and heat tolerance. This new series blooms from early spring to late autumn, with many firm, well-filled spikes that magically attract bees. 'Salgoon®' is one of the earliest salvias on the market and is therefore suitable for marketing for the bed & balcony gardening season and the summer potting season.

Our location for herb and vegetable seedlings is now certified as organic and ready for the production of organic seedlings with organic certification. Whether organic or conventional, this enables our customers to make an important building block in the production chain sustainable by using organic seedlings produced in Germany.

In view of this development, we will be offering organic variants of our successful seedling herbs and vegetatively propagated vegetables, such as the popular sweet potatoes in the **'Erato®'** series, among others, to all customers. In addition, we will also be offering our vegetatively propagated soft fruit range in organic versions. As a result, Volmary is taking a major step forward in supplying production business for both the specialist gardening trade and the food retail trade with organically produced seedlings across their entire range.

Many gardeners and marketers have recognized that good results can be achieved through targeted marketing work in partnership. Volmary makes a convincing impression about the product, in sales as well as online and creates emotional **Volmary® brand experience** with the colourful garden retail brand **Volmary®**.

The **Volmary online portal** offers you the possibility to order seeds & young plants around the clock, as well as many other advantages, such as insight into current availabilities and **marketing materials** for your sales.

**The best products and targeted information** are your success! Our international connections to science, breeders, young plant producers, production nursery, marketers and media provide you with leading breeding and first-hand knowledge. Take advantage of Volmary. Our experienced staff in the **office and field service** will advise you confidentially on questions of variety and culture.

With kind regards

Management and staff

## Products with the highest quality standards

The Volmary® young plant production produces Volmary® young plants using the latest seed and greenhouse technology. Work steps are supported by precise seeding technology and climate control. A computer-aided quality assurance system allows the delivery of high-quality, fully equipped trays. Our efficient logistics can deliver young plants reliably and in the shortest possible time. These guarantee our high-quality standard and enable a safe and successful further culture.

## Exclusive varieties

New and particularly powerful varieties are paramount for offering your customers a modern and high-quality assortment of flowers and vegetables. Volmary®'s Plant Breeding and Information Centre in Münster offers great opportunities to become familiar with new varieties. Exact, practice-relevant cultural recommendations emerge from intensive varietal tests. All new varieties undergo multi-annual tests in Volmary® greenhouses and on their own Volmary® test fields, being also tested for outdoor and bed suitability

Volmary offers a wide range of organic vegetables, herbs and fruit – and organic flowers are also available to you by arrangement. You will receive the full selection of organic young plants, organic cuttings (URC) and organic seeds. We supply unrooted organic cuttings from our EU-certified mother plants. With Volmary's large selection of organic products, you can optimally plan the range for sustainable organic production.

And additional offers such as Multikraft® products let you implement a sustainable production approach. Please contact us, we shall gladly inform you.

## Variety Show Dates

Several times a year, we open the doors of the Volmary® Plant Breeding and Information Centre for customers and prospects to explore the latest varieties.

# MULTIKRAFT® PLANT STRENGTHENING

Naturally effective

The family-owned company Multikraft® is the leading developer and manufacturer of effective microorganisms. With the help of this technology, Multikraft® produces ecological products with sustainable benefits for humans, animals, and the environment. Multikraft® works with nature as a model, promotes its regeneration and strengthens natural processes. To advance these processes, we rely on the smallest organisms – microorganisms that underlie all life on earth. The use of Multikraft® plant strengthening agents favours root formation and increases the resistance of plants to soil-borne diseases and pests. Furthermore, they boost germination, flowering, fruits, plant ripening and flower luminosity. This allows reducing or entirely doing away with pesticides.

The All-In-One products **MK Start**, **MK Gemüse** and **MK Blume** are particularly easy to use and prevent fungal diseases and pests. Stable growth and good branching is promoted by regular application via leaf spraying. Multikraft® products have been successfully deployed in ornamental plant and vegetable cultivation for years and offer an excellent opportunity to produce more environmentally friendly products. You can also do gardening with the power of nature.

**Your Volmary® contact person will be happy to inform you about Multikraft®.**

# HIGH-QUALITY CUTTINGS

directly from our certified mother plant locations.

In addition to its rooted seedlings in various tray sizes, Volmary offers a wide range of unrooted cuttings (URCs) for specialised production companies. Larger undertakings, especially, will appreciate the possibility of obtaining unrooted cuttings directly from our mother plant farms, with the appropriate expertise and free capacities. Due to the standardised preparation and uniformity of the cuttings, almost all varieties are also ideal for the use of cutting robots.

Sustainability has a tradition in our family business. That is why we are constantly optimising our production processes to ensure sustainable and responsible use of resources. We are also committed to the well-being of our staff and the protection of the environment. Our international production sites are MPS-certified, which guarantees you the highest-quality raw material as a customer. International sustainability standards at various locations confirm our successes in sustainable business.

This is also shown by the Fairtrade certification of our mother plant location in Kenya. Fairtrade promotes better working and living conditions in the certified mother plant farms as well as environmental protection. Thanks to the sale of Fairtrade cuttings, Fairtrade producers benefit from fairer trading conditions and can achieve improvements in social and environmental aspects. Strict Fairtrade standards improve social sustainability and protect the environment in the countries of cultivation.

What's more, as the Volmary Group, we also have ORGANIC certification as well as the GLOBAL.G.A.P. certification.

## TAGETES

MARIGOLDS FOR FIGHTING NEMATODES ASTERACEAE

 1000		 °C		
6-10*/15-20**	V-VII	15-18	10-17	-

\*) Early sowing: 6-10 kg/ha

\*\*) Late sowing: 15-20 kg/ha

In some areas of horticulture, nematodes have led to reduced yields or have even caused problems with total crop losses. One way of fighting these pests in the soil is by sowing Tagetes before the start of cultivation.

## 1. Resistances

### 1.1 Terminology

There are different degrees of specification for pests or pathogens in their relationship to plants. The determination of this specification usually requires highly sophisticated analysis techniques. The answer to the question whether a plant can be affected by a pest or pathogen perhaps depends on the applied analysis procedure. It is important to emphasise that the specification of pests and pathogen can generally be subject to temporal and regional fluctuations. The specification also depends on ecological factors, and new harmful organisms or new strains of pathogenic agents that are able to withstand the resistances may develop.

### 1.2 Definitions

#### Immunity:

Neither subject to attack by a certain pest nor infection by a certain pathogen.

#### Resistance:

The ability of a plant type to limit the growth and development of a certain pest or pathogen and/or the damage caused in comparison with susceptible plant types under comparable environmental conditions and pest and pathogen pressure. Under high pest and pathogen pressure, resistant varieties may exhibit some disease symptoms or damage.

### Two resistance degrees are defined:

#### High/standard resistance (HR):

Plant types that highly limit the growth and development of a certain pest or pathogen under normal pest or pathogen pressure in comparison with susceptible plant types. These plant types, however, may exhibit some symptoms or damage under high pest and pathogen pressure.

#### Moderate/intermediate resistance (IR):

Plant types that limit the growth and development of a certain pest or pathogen, but may exhibit more symptoms or damage in comparison with resistant varieties. Moderate/intermediate resistant varieties will still have less serious symptoms or damages than susceptible plant types when grown under comparable environmental conditions and/or pest and pathogen pressure.

#### Susceptibility:

The susceptibility of a plant type is the inability of it to limit the growth and development of a certain pest or pathogen.

### 1.3 Variety Resistance Information

The resistances of our breedings are coded if they have not been noted elsewhere.

For varieties with resistances to more than one pathogen, resistance codes are separated by "/". If a resistance code refers to a particular disease strain, there is no protection against another strain of this pathogen. If the resistance indication does not refer to a certain strain of a pathogen but to uncertain, non-specified strains, it cannot be guaranteed that the respective variety could nevertheless be infected by the stated pathogen.

The resistances indicated in the catalogue are based on current knowledge at the time of printing. A breaking of resistances by the respective pest, however, cannot be excluded.

### 2. Disclaimer

We have produced our new catalogue with great care, however mistakes are not excluded. We cannot assume any liability for the completeness and correctness of the content.

## Generelle salgs- og leveringsbetingelser for NORGRO AS

### 1. Generelt

Disse generelle salgs- og leveringsbetingelsene gjelder alle leveranser fra NORGRO («Selger») til kunder («Kjøper»). De generelle salgs- og leveringsbetingelsene gjelder for alle leveranser fra Selger med mindre noe annet er fastsatt i egen skriftlig avtale for den enkelte leveranse. Avtalte endringer i forhold til de generelle salgs- og leveringsbetingelsene er kun gyldige når de er godkjent av en autorisert representant for Selger.

### 2. Priser, avgifter, frakt, betaling mv.

#### 2.1 Generelt

Pris og frakt kostnader følger Selgers standard betingelser, dersom ikke annet er avtalt med Selger eller representant for Selger. Priser for leveranser er eksklusiv mva. Alle priser er beregnet med forfall pr. 20 dager og betales mot faktura.

Selger har rett til å endre avtalte priser som en følge av økninger i valutakurser, toll- og avgiftssatser, økninger i pris fra produsent eller leverandør, eller som en følge av andre forhold utenfor Selgers kontroll i tiden mellom avtaleinngåelsen og leveringstidspunktet. Endringer som gir et pristillegg på mer enn 10% i forhold til avtalte priser gir Kjøper rett til å heve avtalen. Melding om heving av avtalen må gis Selger snarest og før varene er sendt til Kjøper.

Med mindre annet er avtalt med Selger eller Selgers representant, faktureres leverte varer fra Selger iht. avtalte betalingsbetingelser.

Dersom Kjøper er vesentlig forsinket med betalingen av kjøpesummen, er Selger berettiget til å heve kjøpet. Kjøper plikter å levere varene tilbake i uskadet tilstand, i motsatt fall kan Selger kreve at Kjøper dekker påvist verdiforringelse.

#### 2.2 Utgifter og avgifter

Alle utgifter og avgifter som påføres Kjøper som en følge av de forpliktelser Kjøper har etter avtalen, betales av Kjøper.

#### 2.3 Renter ved forsinket betaling

Ved forsinket betaling påløper forsinkelsesrente i samsvar med lov om renter ved forsinket betaling.

#### 2.4 Motkrav

Kjøper har ikke rett til å holde tilbake noen del av kjøpesummen på grunn av evt. motkrav

#### 2.5 Betalingsbetingelser

Salg av varer og tjenester skjer i henhold til Selgers standard betalingsbetingelser, slik disse er fastsatt til enhver tid.

#### 3. Eiendomsrett, salgspant

Eiendomsretten til leveransen går over på Kjøper når Selger har mottatt fullt oppgjør for leveransen. Selger har salgspant i salgsgjenstanden for kjøpesummen med tillegg av renter og omkostninger inntil kjøpesummen er fullt betalt, jfr. lov om pant av 8. februar 1980 nr. 2 §§3-14-3-22. Selger har rett til å kreve salgsgjenstanden tilbakelevert dersom Kjøper misligholder sin betalingsplikt. Før kjøpesummen er fullt betalt, krever det samtykke fra Selger dersom salgsgjenstanden skal videregjøles, pantsettes eller på noen annen måte disponeres over slik at gjenstandens verdi forringes eller Selgers adgang til å kreve gjenstanden tilbake blir vanskeligiggjort.

#### 4. Kredittinformasjon – suspensjon av leveringsplikt ved mislighold

Selger kan innhente kredittinformasjon om Kjøper og vurdere om Kjøper godkjennes for kreditt i henhold til Selgers rutiner for dette. Selger foretar løpende kredittvurderinger og innhenter offentlig tilgjengelig informasjon i henhold til de plikter som påligger en kredittgiver etter Finansavtaleloven av 26.06.1999 nr. 46.

Ved betalingsmislighold eller annet mislighold på Kjøpers side som har betydning for Selgers leveringsforpliktelse, forbeholder Selger seg retten til å nekte å foreta ytterligere leveranser i henhold til denne avtale, eller å kun levere mot kontant oppgjør, inntil misligholdet er rettet opp. Dersom Kjøper har unnlatt å betale ved forfall og/eller det foreligger åpenbar fare for mislighold av betalingsvilkår på grunn av svekket betalingsevne, betraktes hele og ethvert mellomværende mellom partene som forfalt og ikke leverte bestillinger effektueres kun mot kontant betaling.

#### 5. Levering

##### 5.1 Leveringssted

Salgsgjenstanden regnes som levert når denne er stilt til Kjøpers rådighet på avtalt leveringssted eller det leveringssted som oppgis av selger. Med mindre noe annet er skriftlig avtalt er leveringsstedet Selgers forretningssted. Er det avtalt levering på

Kjøpers forretningssted/ vareleveringsadresse, skjer levering på den oppgitte adressen. Varen regnes som stilt til Kjøpers rådighet fra det tidspunkt varen er overlevert Kjøper. Dersom Kjøper forestår lossing av varen anses levering å ha funnet sted når Kjøper påbegynner lossing. Dersom varen skal leveres til Kjøpers oppbevaringsanlegg og dette skjer ved bruk av tekniske innretninger som tilhører Kjøper, anses levering å ha funnet sted idet varen forlater det transportmiddel som er benyttet for transport av varen til Kjøper.

##### 5.2 Leveringstidspunkt

Levering av varen skal skje ved påkrav i rimelig tid etter kontraktsinngåelsen.

Har en av partene grunn til å anta at levering eller mottak av leveransen ikke kan finne sted til avtalt tid, skal han uten ugrunnet opphold underrette den annen part om årsaken til dette og om mulig opplyse om ny leveringstid.

Overstrides avtalt leveringstid med mer enn tre mnd., har begge parter rett til å heve kontrakten. En part har dog ikke rett til å heve kontrakten dersom forsinkelsen skyldes forhold som vedkommende har ansvar for.

##### 5.3 Kjøpers medvirkning

Kjøperen plikter å yte nødvendig medvirkning ved leveringen, herunder til lossing, mottaks- og kollikontroll. Har Kjøper ikke oppfylt sine forpliktelser ved avtalt leveringstidspunkt, plikter ikke Selger å foreta levering før forpliktelsene er oppfylt.

Selger er ikke ansvarlig for mangler eller forsinkelser ved levering av en ordre i den grad slike mangler eller forsinkelser skyldes at Kjøper ikke har oppfylt sine forpliktelser i henhold til avtalen. Selger er videre ikke ansvarlig for mangler eller forsinkelser dersom Kjøper har unnlatt å gi Selger tilstrekkelige leveringsinstruksjoner eller andre instruksjoner som er relevante for leveringen.

##### 5.4 Leveringshindringer/force majeure

Selgeren har intet ansvar for forsinket eller uteblitt levering hvis dette skyldes forhold som ligger utenfor Selgers kontroll. Som slike hindringer anses omstendigheter som ikke er av en slik beskaffenhet at Selger ved kjøpets avslutning burde ha regnet med dem, f.eks. tilfeldig undergang av alle gjenstander av den art eller det parti kjøpet angår, ved krig, innførselsforbud, forsinket eller uteblitt levering fra fabrikk eller leverandør el. Når en slik hindring inntreffer suspenderes Selgers leveringsforpliktelse så lenge hindringen foreligger, jfr også bestemmelsen om heving i pkt. 10, med mindre partene enes om en forlengelse av leveringstidspunktet. Begge parter kan med 14 dagers skriftlig varsel heve kontrakten dersom leveranse iht. ovenstående blir hindret i mer enn 3 måneder. Dersom salgsgjenstanden ikke kan leveres som følge av leveringshindring, har Kjøper intet krav mot Selger utover en rett til å få tilbakebetalt allerede utlagte deler av kjøpesummen, og dessuten rentegodtgjørelse tilsvarende Norges Banks lånerente til bankene regnet fra innbetalingsdatoen.

##### 5.5 Risiko

Risikoen for salgsgjenstanden går over på Kjøper når levering i samsvar med pkt. 5.2 har funnet sted. Har Selger meddelt at salgsgjenstanden er klar for levering, men Kjøper velger å la gjenstanden være oppbevart hos Selger eller selgers representant, overtar Kjøper risikoen fra det tidspunkt salgsgjenstanden er klar for levering.

##### 6. Undersøkelsesplikt

Så snart Kjøper har mottatt leveransen plikter Kjøper å undersøke om leveransen er i henhold til avtalt mengde og kvalitet.

##### 7. Selgers ansvar ved mangler og forsinkelse

Selger er bare pliktig til å betale erstatning ved vesentlige forsinkelser eller dersom en mangel ikke blir avhjulpet innen rimelig tid, jfr. dog begrensningen i Selgers ansvar etter pkt. 5.4. Indirekte tap så som produksjonstap, tappt fortjeneste, tappt goodwill, konsekvens- eller avbruddstap erstattes ikke. Begrensningen i Selgers erstatningsansvar gjelder også ved evt. dekningskjøp som Kjøper har foretatt.

##### 8. Undersøkelsesplikt

Så snart Kjøper har mottatt leveransen plikter Kjøper å undersøke om leveransen er i henhold til avtalt mengde og kvalitet.

##### 9. Mangler og reklamasjoner

Mangler ved leveransen som Kjøper oppdager eller burde ha oppdaget ved den undersøkelse som skal foretas etter pkt. 8 skal reklameres skriftlig innen 8 – åtte – dager etter levering.

##### 10. Spesielt for såvarer

Omsetningen av såvarer er regulert av Matloven av 19.12.2003, med tilhørende forskrifter. Andre kvanta enn de som er oppført i Selgers katalog ekspederes kun etter selgers mulighet til å gjøre

dette og til en pris fastsatt av selger.

Vårt frø leveres med det forbehold at de bare må benyttes til dyrking av de respektive vekster og skal ikke benyttes til videreavl av frø.

Våre leverandører er ansvarlige for at pakninger inneholder det merkingen viser. Leverte varer må kontrolleres ved mottak av varen. Dersom kunden mener å ha mottatt feil vare, vare som ikke er i samsvar med merkingen, vekt, kolliantall og lignende, må det umiddelbart etter mottak av varen gis skriftlig melding om dette til NORGRO. De leverte varene må ikke tas i bruk utover tiltak som gjør at varen ikke forringes ytterligere. Dersom kunden senere mener å ha mottatt en mangelfull leveranse, må kunden reklamere skriftlig til NORGRO uten ugrunnet opphold etter at mangelen blir oppdaget. Merking og førester skal tas vare på i tilfelle senere reklamasjon.

Det gis ikke erstatning for leverte varer utover fakturaverdien, eller ut over hva våre leverandører erstatte. Unntaket er såvare selger har levert som viser seg å være av annen sortekthet eller vareslag enn oppgitt.

For småplanter, krydder, frukt- og bærplanter, gjødsel og settepoteter er det egne salgs- og leveringsbetingelser i tillegg til disse generelle.

##### 11. Produktansvar

Selger fraskriver seg eventuelt produktansvar pga. mangel ved salgsgjenstanden, med mindre slikt ansvar følger av lov produktansvar av 23.12.1988 nr. 104.

##### 12. Avbestilling

Kjøper har ikke rett til å avbestille salgsgjenstanden eller deler av denne. Dersom Kjøper likevel ønsker å avbestille salgsgjenstanden eller deler av denne, og dette godkjennes av selgeren, har selgeren rett til å kreve dekt det arbeid og de kostnader ved leveransen som er pådratt. Videre kan selgeren kreve dekt tappt fortjeneste, begrenset oppad til 15 % av kjøpesummen på det som avbestilles.

Avtale om rett til avbestilling og vilkårene for dette skal være skriftlig for å kunne gjøres gjeldende overfor selgeren.

##### 13. Vernetting

Tvister mellom partene i anledning dette kontraktsforhold skal avgjøres av de ordinære domstoler, derom partene ikke avtaler voldgiftsbehandling eller et avgjørelsesorgan skal overlates til en annen instans (reklamasjonsnemnd el.).

Partene vedtar Selgers forretningssted eller bosted som rett vernetting.

## Spesielle salgs- og leveringsbetingelser småplanter

### 1. Generelt

Disse spesielle salgs- og leveringsbetingelsene for småplanter, blomster og krydder, er et tillegg til de generelle salgs- og leveringsbetingelsene til NORGRO AS (Selger).

### 2. Ordrebekreftelser

Ordrebekreftelser vil bli sendt kunde så snart dette er mottatt fra leverandør.

Selger har rett til å endre leveringsdato og plantsort ut i fra faktisk tilgjengelighet. Slike endringer anses som godkjent dersom ikke avslått av kjøper innen 4 kalenderdager etter mottak av ordrebekreftelse.

### 3. Transport

Transport av småplanter innad i Norge foregår på CC-container. Leie/lån av CC-containerer er et forhold mellom kunde og transportør. NORGRO AS er ikke en part i dette forholdet.

NORGRO AS bestiller transport av planter fra mottakssted i Norge til kunde på kundens regning.

Transportør er Alex Andersen hvis ikke annet er avtalt mellom selger og kjøper.

### 4. Levering

Levering av planter skjer med biltransport så hurtig som mulig, og i løpet av avtalt leveringsuke forutsatt at transportør har mulighet til dette.

Kunden er forpliktet til å oppgi forhold som sikrer at plantene kan bli levert hurtigst mulig uten at dette skaper problemer for transportør eller forringer kvaliteten på plantene.

Kunden er forpliktet til å kontrollere planter ved mottak for å identifisere eventuelle synlige mangler og feil i henhold til fraktbrev/ordrebekreftelse.

### 5. Reklamasjon

Reklamasjon av mangler skal være skriftlig med tydelige bilder som dokumenterer manglene, så snart som mulig og innen 3 kalenderdager. Planter med mangler skal oppbevares for inspeksjon av representant fra vår leverandør og/eller NORGRO AS på en slik måte at plantene ikke forringes ytterligere.

Er reklamasjon berettiget erstattes disse med nye planter. Dersom det ikke er mulig å erstatte med nye planter erstattes tapet med fakturaverdien for de reklamerte plantene ut over leverte telleplanter av aktuell sort. Reklamasjon som følge av transportskader tas opp umiddelbart med transportør med kopi til NORGRO AS. NORGRO AS og plante produsent er ikke ansvarlig for transportskader.

### 6. Råd. Plantebeskyttelse og kultivering

Råd fra representant fra NORGRO AS eller våre leverandører er ikke underlagt salgs- og leveringsbetingelsene. De representerer kun ikke bindende informasjon og avløser ikke kjøperen fra sine forpliktelser om profesjonell behandling av varen og aktuelle norske lover.

I tilfeller hvor det blir gitt råd ved bruk av kjemiske produkter til plantebeskyttelse, vekstregulering eller næringsmangler er kjøper forpliktet til først å teste anbefalingen på et mindre antall planter for kontroll av effekt og eventuell skade på planten. Først etter at eventuelle skader ikke er observert innen rimelig tid kan anbefalingen gjennomføres på resterende plantemateriale under tilsvarende klimatiske forhold.

NORGRO AS er ikke ansvarlig for skader på grunn av kultiveringsfeil.

### 7. Eiendomsrett, lisenser, reproduksjon

Lisensiert plantemateriale er ikke tillatt å formere for videresalg uten spesiell avtale med sortseier.

Oppdages eventuelle mutasjoner skal NORGRO AS og sortseier informeres umiddelbart for undersøkelse og evaluering. Plantemateriale av mutasjon skal frigis til NORGRO AS eller sortseier umiddelbart etter at dette er oppdaget.

Kjøper kan ikke benytte varemerke, symboler eller etiketter på andre planter enn planter som er levert av aktuell planteleverandør.
